Efetobor Oyibo

Place of birth: Port-Harcourt, Nigeria | **Phone:** (+234) 07049148850 (Home) | **Email address:** efetobor3x@gmail.com | **Website:** https://my-portfolio-beta-sandy-50.vercel.app/ | **Address:** Port-Harcourt, Nigeria (Home)

EDUCATION & TRAINING

10/01/2021 - 10/10/2025 - OMU-ARAN, NIGERIA

BACHELOR OF ENGINEERING, ELECTRICAL AND INFORMATION ENGINEERING- LANDMARK UINVERSITY

Studied core areas of electrical and information engineering including circuit design, power systems, digital and analogue electronics, control systems, signal processing, embedded systems, and telecommunications. Gained hands-on experience through laboratory work, MATLAB/Python simulations, and engineering design projects.

Level in EQF: 6

WORK EXPERIENCE

04/03/2024 - 30/08/2024 - PORT-HARCOURT, NIGERIA

ELECTRICAL ENGINEER INTERNTOTAL ENERGIES

Assisted the Electrical & Instrumentation team in daily operations, inspections, and maintenance activities across oil & gas facilities. Supported troubleshooting of electrical systems, power distribution panels, and instrumentation devices. Participated in equipment testing, cable routing checks, safety compliance audits, and documentation of maintenance reports. Gained hands-on experience with industry standards, HSE practices, and the operation of generators, transformers, and protection equipment.

10/08/2025 - 10/10/2025 - ABUJA, NIGERIA

CHIEF TECHNOLOGY OFFICERESSAYKREEK

Led the technical strategy and product development of an e-learning and essay-support platform. Oversaw system architecture, backend development, and deployment of scalable digital solutions. Managed development roadmaps, coordinated with design and content teams, and ensured platform reliability, data security, and user experience.

01/02/2025 - 30/04/2025 - ENGLAND, UNITED KINGDOM

TECHNICAL WRITER RENTFI

Wrote and edited clear, developer-focused documentation for RentFi's blockchain-powered real estate platform. Collaborated with engineers to explain smart contract workflows, tokenized rental assets, platform APIs, and user processes. Delivered product guides, technical specs, and knowledge-base content to support both users and development teams.

10/04/2026 - CURRENT - PORTHARCOURT, NIGERIA

INSTRUMENTATION ENGINEERMINIM AND TONYE NIG. LTD

Working on VFD to servicing and installation of overhead crane

Install, calibrate, and maintain instrumentation and control systems.

Monitor and troubleshoot industrial measuring instruments and sensors.

SKILLS

Microsoft Office | Microsoft Excel | Python (computer programming) | Node.js | React.js | PostgreSQL | Github | software ui design patterns

CERTIFICATIONS

01/07/2025 Udemy
100 Days of Code: The Complete Python Pro Bootcamp

Online - Gained hands-on experience in Python development through 100 days of structured coding projects, including automation scripts, data analysis, API integrations, Flask web applications, and full-scale capstone projects.

Link https://udemy-certificate.s3.amazonaws.com/pdf/UC-65e1c106-0928-438d-baf4-38649478b0cc.pdf

02/05/2024 UISL organized by Total Energies E&P
Microsoft Office Level 1 & 2 for Industrial Trainees

Project Based - Gained practical skills in Microsoft Word, Excel, and PowerPoint with emphasis on document formatting, spreadsheet formulas, data analysis, charts, table management, and creating professional presentations tailored for industrial reporting.

NETWORKS AND MEMBERSHIPS

30/10/2025 - CURRENT Nigeria
Nigerian Society of Engineers (NSE) Inducted as a Graduate Member of the Nigerian Society of Engineers (NSE), demonstrating commitment to professional engineering standards, ethics, and continuous development.

PROJECTS

01/05/2025 - 01/06/2025
Movie Review Classifier (LSTM + GloVe) This project classifies movie reviews as positive or negative using an LSTM neural network and pre-trained GloVe word embeddings
Link https://github.com/Oyibo-Efetobor/movie_review_classifier

01/09/2024 - 30/05/2025
FAKE NAIRA DETECTION & DENOMINATION DETECTION USING MACHINE LEARNING This project implements a software-based solution for detecting fake Nigerian currency notes using image processing techniques and machine learning. The system utilizes MATLAB for the algorithmic pipeline and leverages Support Vector Machines (SVM) and Optical Character Recognition (OCR) for classification and denomination recognition respectively.
